

Service Provider and Partner

We offer you our support for your underground projects under execution – as well as during tender stage – as a service provider and your partner.

We support you on your ongoing tunneling projects.

Pragmatic and hands-on

solution- focused

in partnership

Who we are

Two practitioners with many years in underground works complement one another. We believe that we can offer you valuable contributions to the successful completion of your tunneling projects.

Being a practitioner with expertise in tunnel construction, Manfred Jäger will bring his wealth of experience as a contractor. Theo Eggenberg has extensive experience in conceptual design and implementation of tunneling equipment as well as in the area of logistics in tunneling.

Customer value

Our service will guarantee significant advantages for you:

You obtain an independent third opinion.

Verification and validation of your own considerations

New ideas can lead to beneficial alternative solutions.

Quick recognition and implementation of optimizations

Principles

Our service is based on these principles:

Confidentiality

Teamwork in partnership

High leverage with straightforward cost

Quick and unbureaucratic proceedings

Practical and solution-focused

Clear and jointly defined scope of services

Service Offer

We adjust our diverse service portfolio to your current and individual project phase. During execution of your tunneling project, we join you to help by searching for solutions and implementing them on your way to success.

We are used to be active underground at the place of action, wearing rubber boots rather than suits. In close cooperation with your staff onsite, we can, among others, provide particular support such as:

Jobsite analysis

Trouble shooting

Logistics concept

Innovative solution finding

Execution concept

Sequence planning

Verification and validation of solutions

Jobsite organization

Plant/Machine concept

Alternative ideas / concepts

Jobsite documentation

Risk assessment

Feasibility studies

Works progress analysis and advance rate prognosis

Controlling
